I am an engineered cement installation specialist with extensive expertise in substrate preparation including self-leveling underlayments, concrete resurfacing and repair. In a partnership with Ardex Engineered Cements, I offer a wide array of high-performance concrete solutions for general contractors, designers, architects and homeowners that include self-leveling underlayments, designer interior/exterior floors, interior concrete walls, re-sloping and restoring patios and moisture related issues. Advanced Leveling & Concrete Solutions is an Ardex LevelMaster Elite Installer as well as a PanDomo Elite Installer committed to excellence in all aspects of the engineered cement business.

A complete concrete restoration and re-surfacing company utilizing the Ardex & PanDomo product line. Advanced Leveling & Concrete Solutions has extensive knowledge and training to fix most concrete problems

Additional Honours & Awards

Ardex Levelmaster Elite Installer, PanDomo Elite Installer, Floors featured in Southern Living, Certified moisture Tech.

Bought my first Hippo just over 2 years ago, my pump now collects dust. I have a 4000 bag pour coming up in New Orleans where they are requiring 1/2" of Ardex. My plan was to purchase 2 more Hippo's and run 8 for the duration of the mix. I know Ben Mack quite well. I am an Ardex Level Master Elite and have been for around 12 years. My guys prefer the Hippos over anything we have tried.

Ohh my favorite mixers we are running 6 on our current project. 10,000 sq ft of Ardex underlayment should take us an hour... Love the hippos!!!
