SIKALEVEL & CS UNITEC

August 12, 2016

Mr. Saunders,

After completing laboratory and on-site field evaluations of the CS Unitec Hippo Mixer, Sika Corporation endorses this product to be used with the following Sika materials:

- SikaLevel 125
- SikaLevel 315

The above mentioned SikaLevel products can be mixed using the Hippo Mixer in volumes up to the maximum recommended by CS Unitec. Each product should be mixed for a minimum of 3 minutes. As with all high speed mixers, less water than recommended may be used to reach the desired consistency.

For all other technical information regarding the SikaLevel line of products, please consult the Sika Technical Data Sheet located on the website at usa.sika.com or contact our Technical Service Department at 1-800-933-SIKA.

Sincerely,

Scott DiStefano
Product Engineer
